**Prototyping:** Wireframing, Interactive Prototypes, User Flows

**Version Control:** Git, GitHub

**Soft Skills:** Adaptability, Creativity, Patience

**Other:** Cross-Browser Compatibility, SEO Basics, WordPress

---

## Projects

### Personal Portfolio Website

Built a personal portfolio using HTML, CSS, and JavaScript.

- Designed a responsive layout to showcase my work and skills.
- Added interactive elements like a project gallery and smooth scrolling.
- Ensured cross-browser compatibility for a consistent user experience.

### E-commerce Website

Developed an E-commerce website using React.js.

- Built a responsive interface for product browsing and shopping.
- Implemented dynamic features like product filtering, sorting, and a shopping cart.
- Optimized performance for a smooth user experience across devices.

### Mobile App Design

Designed a mobile app using Figma.

- Created detailed wireframes and interactive prototypes to visualize user journeys.
- Designed a user-friendly interface focused on simplicity and ease of use.
- Iterated on designs based on user feedback and testing results.
